Display Info.

Declare Variable

```
float totalincome = 0.0;  
int age = 0;  
float tax 1 = 0.15;  
float tax 2 = 0.04;  
float tax 3 = 0.08;  
float tax totaltaxAmt = 0.0;
```

Input/Output

totalincome

Process

```
if(totalincome=>200,000);  
    totaltaxAmt = totalincome * tax1;  
else  
    Input  
    int age;  
    if (int age=>60);  
        totaltaxAmt = totalincome *tax2  
    else  
        totaltaxAmt = totalincome *tax3
```

Output

totaltaxAmt;
"Thank You"
